

Control of Condensation in Buildings

Product Information Sheet

Eaves Comb Filler - G1275

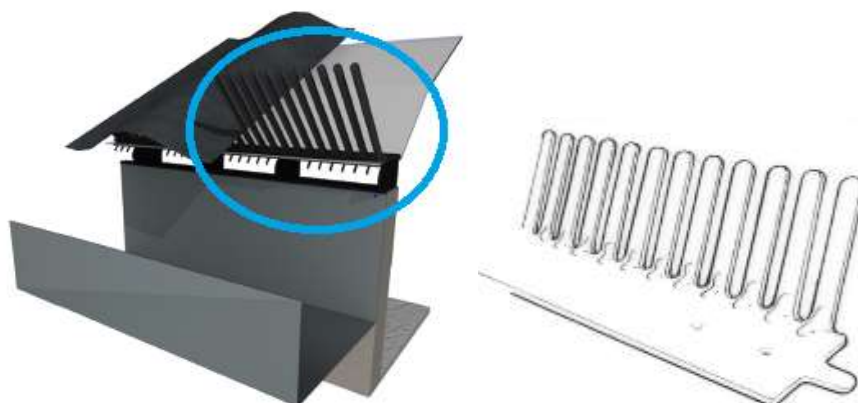

Description:

Commercial & Residential - The G1275 Eaves Comb Filler is designed with flexible fingers which adjust to fill the gaps left when using profiled tiles or steel roof cladding, preventing entry of birds and large insects beneath the tiles.

The use of the G1275 Eaves Comb Filler eliminates the need to make or purchase expensive purpose made profiled fillers.

Product Benefits

- Prevents entry of birds and nesting insects with the recommended 4mm grille
- 1m lengths for ease of installation
- Profiles to the underside of the roof covering

Fitting Instructions:

The G1275 Eaves Comb Filler should be nailed or screwed to the top of the fascia board or wall Girt through the fixing holes provided along the full length of the eaves and joined where necessary. It can be fixed over the roofing membrane if required.
