Provided the VENT Vented Batten are installed in accordance Design & Specification Guides supplied by VENT.

VENT warrants the VENT Vented Batten under the following terms & conditions:

- a. This warranty is given to consumers as defined in and who have the rights under the Consumer Guarantees Act 1993 and should be read with the statutory consumer guarantees contained in that Act.
- b. This warranty will apply to defects appearing within 30 years from the date of purchase & where notification of defects is received in writing within 28 Days of the defect appearing.
- c. Warranties will only be honoured if the VENT products in question were installed, used and maintained in accordance with VENT installation guides all of which are available on www.eboss.co.nz and on the VENT website www.vent.nz
- d. Warranties will not apply to damage caused by external physical agents, accidental damage or other Force Majeure.
- e. The sole & exclusive remedy with regard to the above warranty is limited to the repair or supply of replacement profiles at VENTs discretion

This warranty shall be construed and interpreted in accordance with New Zealand Law and shall be subject to the jurisdiction of New Zealand Courts only.

This warranty does not affect the statutory rights of consumers.

Control of Condensation in Buildings

Product Information Sheet

VENT Ventilated Batten – VB20

Description

Ideal product for residential skillion roofing design and commercial buildings.

The VB20 is a Polypropylene Ventilated Batten which provides a continuous 18,000mm² per linear metre of passive airflow. The will enable the movement and release of warm air which can eliminate condensation in the roof void and wall cavity. The VB20 is designed as a dual-purpose product providing the following benefits:

- ✓ *Peel-off adhesive backing for temporary fixing, hence reducing labour time/cost*
- ✓ *It is manufactured with recommended 4mm vents which make it ideal as a roof perimeter batten as it will repel the ingress of nesting insects.*
- ✓ *The VB20 is also designed to provide a strong, durable purlin vent to allow passive airflow throughout the entire roof area.*
- ✓ *When used as a purlin batten, the VB20 has been upgraded in strength and tested to exceed foot traffic weight requirements on the roof above.*
