

VENT EAVES COMB FILLER G1275

DESCRIPTION

The VENT Eaves Comb Filler G1275 is designed with flexible fingers which adjust to fill the gaps left when using profiled tiles or steel roof cladding. This prevents entry by birds and large insects beneath the tiles.

FEATURES

- More cost effective than using purpose made fillers.
- Allows air to flow through the roofing profiles between the roof and membrane/underlay reducing dew point transfer.
- Profiles to the underside of the roof covering.
- 1m Lengths for ease of installation.
- Prevents ingress of nesting birds.

SCOPE OF USE

- Commercial and residential application.
- Suitable for use on all roof types.

WARRANTY

- 15 years

MAINTENANCE

- No maintenance requirements.

SPECIFICATIONS

| | |

VENT Eaves Comb Filler G1275 with VENT Over Fascia Vent G1200N

VENT EAVES COMB FILLER G1275

INSTALLATION

1. The G1275 Eaves Comb Filler should be nailed or screwed to the top of the fascia board or over-fascia vent through the fixing holes provided along the full length of the eaves and joined where necessary.
2. It can be fixed over a paper support tray if required.
3. Confirm with fascia manufacture correct screw fixings to ensure fascia warranties are upheld.
4. For metal fascias Armagalv screws are recommended.
5. The VENT Eaves Comb Filler should not be exposed to direct sunlight for more than 30 days.
